Week03 Report · Revision 2717

Proposed QA Control Review / participation and decision rights

PEOPLE

Who is affected?

RELATIONSHIPS

Who contributes and decides?

NEXT CONVERSATIONS

What needs confirmation?

1. People and roles

QA and night-shift operators

Night Shift Operators are affected and therefore should be included in the information that is gathered.

Engineering

Elias can explain the commands we have available and can explain scheduler records. He cannot identify origins. he can only use his expertise to assist those with approval authority in making financial decisions.

Operations

Mara coordination role is to gather all necessary information from various departments and her priority to to distinguish the people affected, the people doing the work, and the people offering specialized consultation. How to gather the missing participants will require another decision maker.

Sponsor and record custodian

QA, Engineering, and Operations. Operations perform checks and record findings, QA knows and can describe how the cell works, and Engineering can explain commands and scheduler records.

2. Relationships and next steps

Competing needs and tradeoff

Provide talking point that will be discussed to Night Operators before meeting. Recorded Day Time meeting and include information and concerns from Night operators. Provide opportunity for Night

operators to give feedback on meeting after it has completed.

Consultation plan

All users that may have been affected regardless of how small the affect is. A person with little authority may still be able to provide insight on the greater issue by giving information that may have only affected their department or workflow thus giving more information on the greater issue by providing more variables to consider.

Missing voices and validation

Night Shift Operators. QA should seek confirmation. Answers can be recorded by providing written questions and responses from Night Shift operators using appropriate forms of communication. (Company email, shared drives, etc)

Next step toward requirements

Any disagreements between departments and participants. The map helps invite the right people as it gathers those affected by the issue and those specializing in the workflow surrounding it.

3. Book evidence connection

Book form connection

It allowed the roles to make more sense in my head. In this case Mara's role is to lead and get this issue resolved in a timely manner. She relies on the experts or "masters" to ensure quality work while she or any other "Chief" ensure the project moves forward smoothly. Both are necessary as without a chief the project may never move forward and without masters the quality may not suffice and the project could be a failure.
